## Part I

# Introduction

## 1 Usage

This package is called `tikz-ext`, however, one can't load it via `\usepackage`.<sup>1</sup> Instead, this package consists mostly of `pgf` and `TikZ` libraries which are loaded by either `\usepgflibrary` or `\usetikzlibrary`.

## 2 Why do we need it?

Since I have been answering questions on [TeX.sx](https://tex.stackexchange.com/) I've noticed that some questions come up again and again, every time with a slightly different approach on how to solve them.

I don't like reinventing the wheel which is why I've gathered the solutions of my answers in this package.

## 3 Having problems?

Note however, that most of these extensions haven't been stress-tested properly and might be considered experimental.

Don't hesitate to open an issue on GitHub. You probably found a bug.

## 4 Namespaces and `TikZ-Extensions` macros

Since some parts of this package have existed in some form since 2013, the choice for key names and in which `pgfkeys` namespace they reside is not always optimal. They often reside in the main `/tikz` or `/pgf` path. Similar applies to macro names.

For future versions, it is planned to move those in the `/tikz/ext` namespace. For keys in the `/pgf` namespace, this will probably not happen since it makes it not very intuitive to use them in `TikZ`.

Starting from version 0.6, `TikZ-Extensions` provides commands that return the current version for compatibility testing. The second simply increments with every release so that the first doesn't need to be parsed.

`\tikzextversion`

Returns 0.6.

`\tikzextversionnumber`

Returns 8.

Also starting from version 0.6, there's `\tikzextset`.

`\tikzextset{<options>}`

This command will process the `<options>` using the `\pgfkeys` command with the default path set to `/tikz/ext`.

---

<sup>1</sup>Except for `pgfcalendar-ext` and `pgffor-ext`.

## 5 Compatibility with older versions

As discussed in the previous section, keys and commands of extensions that existed before version 0.6 that do not appear in this manual are considered deprecated.

`/tikz/ext/compat=pre 0.6|0.6|newest` (default pre 0.6)

This sets the global compatibility setting for every extension of this package (whether already loaded or not).

The following table shows the compatibility settings for each extension. A ✓ denotes an available setting where ✓ denotes the default compatibility setting.

| Extension                  | pre 0.6 | 0.6 | newest |
|----------------------------|---------|-----|--------|
| ext.scalepicture           | ✓       | –   |        |
| ext.transformations.mirror | ✓       | –   |        |

For each available extension the compatibility setting can be adjusted as well after the extension is loaded.

`/tikz/ext/compat/scalepicture=<version>` (default pre 0.6)

`/tikz/ext/compat/transformations.mirror=<version>` (default pre 0.6)

It should be noted that at this point, a compatibility setting can be reversed since they only forward argument from an old key or command to the new version.

The changes are as follows.

**pre 0.6** This version is different than the newest.

**scalepicture** The keys are in the `/tikz` name space instead of the `/tikz/ext` namespace.

**transformations.mirror** The keys are in the `/tikz` name space instead of the `/tikz/ext` namespace. The commands of the `pgf` library start with `\pgf` instead of `\pgfext`.

**0.6** No compatibility changes. Is the same as newest.

**newest** No compatibility changes.

## Part II

# TikZ Libraries

These libraries only work with TikZ.

## Part III

# PGF Libraries

These libraries (should) work with both PGF and TikZ.

```
\usetikzlibrary {graphs,graphdrawing,ext.misc} \usegdlibrary {force}
\tikzset{
  mynode/.style={
    circle, minimum size=10mm, draw, densely dashdotted, thick,
    decide color/.expand once=#1,
    decide color/.style 2 args={
      /utils/TeX/if=c#1
      {/utils/TeX/ifnum={#2<5}{blue!light}{blue!dark}}
      {/utils/TeX/ifnum={#2<8}{light}{dark}}},
    light/.style={fill=gray!20}, blue!light/.style={fill=blue!10},
    dark/.style={fill=gray!60}, blue!dark/.style={fill=blue!30}}
\tikz\graph[
  spring electrical layout, vertical=c2 to p13,
  node distance=1.5cm, typeset=$n_{\tikzgraphnodetext}$,
  nodes={mynode=\tikzgraphnodetext}] {
  % outer ring
  c2 -- {p1, p11, p6};
  p1 -- {p8, c6, p11};
  p8 -- {p3, p10, c6};
  p3 -- {p13, p15, p10};
  p13 -- {p15, c7};
  c7 -- {c3, c4, p15};
  c3 -- {p14, c4};
  p14 -- {p7, c4};
  p7 -- {p9, p2, c4};
  p9 -- {c5, p12, p2};
  c5 -- {c1, p4, p12};
  c1 -- {p6, p4};
  p6 -- {p11, p4};
  % inner ring
  p11 -- {c6, p12, p4};
  p5 -- {c6 -- {p10, p12}, p10 -- p15, p15 -- c4, c4 -- p2, p2 -- p12, p12 -- p4};
};
```

## Part IV

# Utilities

```
\usetikzlibrary {ext.misc}
\begin{tikzpicture}[
  declare function={bigR(\n)=smallR+.05*\n;},
  declare constant={smallR=1; segments=20;},
  full arc=segments]
\foreach \iN[evaluate={\endRadius=bigR(\iN+1);}, use int=0 to segments-1]
\filldraw[fill=gray!50] (\iN R:\endRadius)
  arc [radius=\endRadius, start angle=\iN R, delta angle=+IR] -- (\iN R+1R:smallR)
  arc [radius=smallR, end angle=\iN R, delta angle=-IR] -- cycle;

\node                                {${\phi^2}$};
\node at (north west:{sqrt 2 * bigR(segments/2)}) {${\{\Omega\}_{i=1}^n}$};
\node[rotate=-.5R, right] at (-.5R: bigR segments) {${\partial\phi}$};

\tikzset{yshift=-.5cm, declare constant={segments=25;}, full arc=segments}
\filldraw[fill=gray!50] (right:smallR)
  \foreach \iN[evaluate={\endRadius=bigR(\iN+1);}, use int=0 to segments-1] {
    -- (\iN R:\endRadius) arc[radius=\endRadius, start angle=\iN R, delta angle=IR]}
    -- (right:smallR) arc[radius=smallR, start angle=0, delta angle=-360];

\node                                {${\phi^2}$};
\node at (north west:{sqrt 2 * bigR(segments/2)}) {${\{\Omega\}_{i=1}^n}$};
\node[rotate=-.5R, right] at (-.5R: bigR segments) {${\partial\phi}$};
\end{tikzpicture}
```

## Part V

# Changelog, Index & References

## Changelog

### Version 0.6 (2024-07-27)

- Added `\tikzextset`, `\tikzextversion` and `\tikzextversionnumber`
- Added six new auto placement mechanisms: `ext/above`, `ext/below`, `ext/west`, `ext/east`, `ext/north` and `ext/south`.
- Added `ext/auto offset` for auto placement.
- Added `ext/precise auto angle`.
- Added TikZ library `ext.arrows-plus`.
- Added TikZ library `ext.topaths.autobend`.
- Made `ext.node-families` and `ext.scalepicture` memoizable.

### Version 0.5.1 (2023-04-02)

- Added PGF library `ext.arrows`.
- Bugfix to `ext.pgfkeys-plus`. [\[2\]](#)

### Version 0.5 (2023-03-17)

- Added package `pgffor-ext`.
- Added TikZ library `ext.nodes`.
- Added TikZ library `ext.layers`.
- Bugfixes to `ext.calendar-plus`.
- Allow the original rectangle timer with `ext.paths.timer`.

### Version 0.4.2 (2022-10-30)

- Added TikZ library `ext.scalepicture`.
- Bugfixes to `shapes.uncenteredrectangle`, `paths.ortho`, `positioning-plus` and `pgfcalendar-ext`.

### Version 0.4.1 (2022-10-23)

- Cleaned up directory structure of documentary.
- Added PGFkeys library `ext.pgfkeys-plus`.
- Added shape `uncentered rectangle` (PGF library `ext.shapes.uncenteredrectangle`).
- Fixed `ext.paths.arcto` – again [\[1\]](#).

### Version 0.4 (2022-10-10)

- CTAN version of 0.3.1

### Version 0.3.1 (2022-10-09)

- Fixed `ext.paths.ortho` keys only `vertical first` and only `horizontal first`.
- Moved all (except the `to paths`) to namespace `/tikz/ortho`. `/tikz/hvvh` and `/tikz/udlr` are considered deprecated.
- Fixed `\pgfcalendarjulianyeartoweek`.
- Added more calendar tests.
- Added directory structure.

### Version 0.3 (2022-09-24)

- Added shape `circle arrow` (PGF library `ext.shapes.circlearrow`).

- Added shape `circle cross split`  
(PGF library `ext.shapes.circlecrosssplit`).
- Added shape `heatmark`  
(PGF library `ext.shapes.heatmark`).
- Added shape `rectangle with rounded corners`  
(PGF library `ext.shapes.rectangleroundedcorners`).
- Added shape `superellipse`  
(PGF library `ext.shapes.superellipse`).
- Added TikZ library `ext.node-families.shapes.geometric`.
- Fixed `ext.node-families`' key size.
- Renamed internal macros to use custom namespace starting with `\tikzext@`.
- Added some references.

#### Version 0.2 (2022-08-21)

- Added TikZ library `ext.positioning-plus`.

- Added TikZ library `ext.node-families`.

#### Version 0.1 (2022-08-16)

- Added TikZ library `ext.calendar-plus`.
- Added TikZ library `ext.misc`.
- Added TikZ library `ext.paths.arcto`.
- Added TikZ library `ext.paths.ortho`.
- Added TikZ library `ext.paths.timer`.
- Added TikZ library `ext.patterns.images`.
- Added TikZ library `ext.topaths.arctthrough`.
- Added TikZ library `ext.transformations.mirror`.
- Added PGF library `ext.transformations.mirror`.

# Index

This index contains automatically generated entries as well as [references](#) to original functionalities of `PGF/TikZ` and [references](#) to functionalities outside of `PGF/TikZ`.
